Website Specifications

Company introduction:

Karlo's car rentals is company that rents automobiles for short periods of time to the public, generally ranging from a few days to a few weeks. Karlo Car Rentals was established on 25 April 2018. Its aim is to primarily serve people who have a car that is temporarily out of reach or out of service like travellers who are out of town or owners of damaged or destroyed vehicles who are awaiting repair or insurance compensation. The organisation structure of Karlos Car Rental Company starts with the general manager which is the CEO that is responsible for overseeing the entire car rental business, the deputy manager that undertakes performance management for team members and assign each employee goals and tasks, sales personnel they answer questions from customers about prices and which vehicles are available, take bookings and explain the terms of rental agreements. complete paperwork, and take payments, the supplies officer who keeps records of stationery, the human resources manager who is responsible for employees' records, accountant, secretary, messenger

Website objective:

- Make sure visitors are aware of the company's offers by clearly presenting the fleet, services, and business.
- Use email links, phone clicks, and contact forms to generate qualified enquiries.
- For quick verification, let clients upload identification while making a reservation.
- At pickup and return, allow employees to note odometer readings.
- Cut down on phone reservations and manual administrative effort.
- Provide a fast-loading, mobile-first, responsive website.
- Make sure the website is safe (HTTPS) and safeguards client information.

Website Goals:

- To cut down on the manual administration:
  Reduce the amount of time employees spend manually entering data and making phone or email reservations**.**

- Boost client satisfaction and confidence:
  To boost confidence and cut down on questions, provide clear car information, pricing, and rental terms.

- Increase discoverability:
  Improve search visibility for local car rental queries.

- Keep data safe and secure:
  Use HTTPS throughout the website, safeguard client data, and adhere to safe file upload and password storage procedures.

- Make sure accessibility and performance are mobile-first:
  Provide quick, responsive pages that adhere to accessibility guidelines and function well on smartphones.

Target audience (demographics & technical aptitude)

- Main audience: Locals and visitors looking for information on renting or renting a car
  Adults 22–65+, locals, tourists, and business travellers make up the demographics and income levels vary according on the type of vehicle.
  Technical aptitude: Low to moderate; majority utilise cellphones and search engines; rather than conducting business online, anticipate to make a call or fill out a straightforward contact form.

- Suppliers, corporate clients, and partners make up the secondary audience.
  Demographics: Local companies or agencies seeking corporate agreements or fleet hire.
  Technical aptitude: Moderate; clear communication channels and downloadable PDFs are expected.

- Internal audience: Accountant and employees
  To change content and locate contact/operational procedures.

Website Type

A general business service website (informational) does not include an online booking or payment system, but it does advertise the company, showcase services and car offers, gather leads and queries (contact forms, phone/email), and provide information to personnel.
