Website Specifications, Information Design & Taxonomy, Technical Brief

Website Specifications

Company introduction:

Website Goals:

- To cut down on the manual administration:
  Reduce the amount of time employees spend manually entering data and making phone or email reservations**.**

- Boost client satisfaction and confidence:
  To boost confidence and cut down on questions, provide clear car information, pricing, and rental terms.

- Increase discoverability:
  Improve search visibility for local car rental queries.

- Keep data safe and secure:
  Use HTTPS throughout the website, safeguard client data, and adhere to safe file upload and password storage procedures.

- Make sure accessibility and performance are mobile-first:
  Provide quick, responsive pages that adhere to accessibility guidelines and function well on smartphones.

Target audience (demographics & technical aptitude)

- Main audience: Locals and visitors looking for information on renting or renting a car
  Adults 22–65+, locals, tourists, and business travellers make up the demographics and income levels vary according on the type of vehicle.
  Technical aptitude: Low to moderate; majority utilise cellphones and search engines;

rather than conducting business online, anticipate to make a call or fill out a straightforward contact form.

- Suppliers, corporate clients, and partners make up the secondary audience.
  Demographics: Local companies or agencies seeking corporate agreements or fleet hire.
  Technical aptitude: Moderate; clear communication channels and downloadable PDFs are expected.

- Internal audience: Accountant and employees
  To change content and locate contact/operational procedures.

Website Type

A general business service website (informational) does not include an online booking or payment system, but it does advertise the company, showcase services and car offers, gather leads and queries (contact forms, phone/email), and provide information to personnel.

Information design and taxonomy

Home

Navbar

Hero Header Section

Headline "Reliable Rentals for Travelers & Locals" with sub-headline for out-of-towners and insurance claimants. Prominent "View Our Fleet" CTA button.

Features List Section

Briefly outline key points: Established 2018, Professional Team, Trusted by locals and insurers.

Gallery Section

Clean lead gen form with fields for Name, Email, and File Upload for ID verification.

Testimonial Section

Short testimonials from satisfied customers, emphasizing reliability and trust.

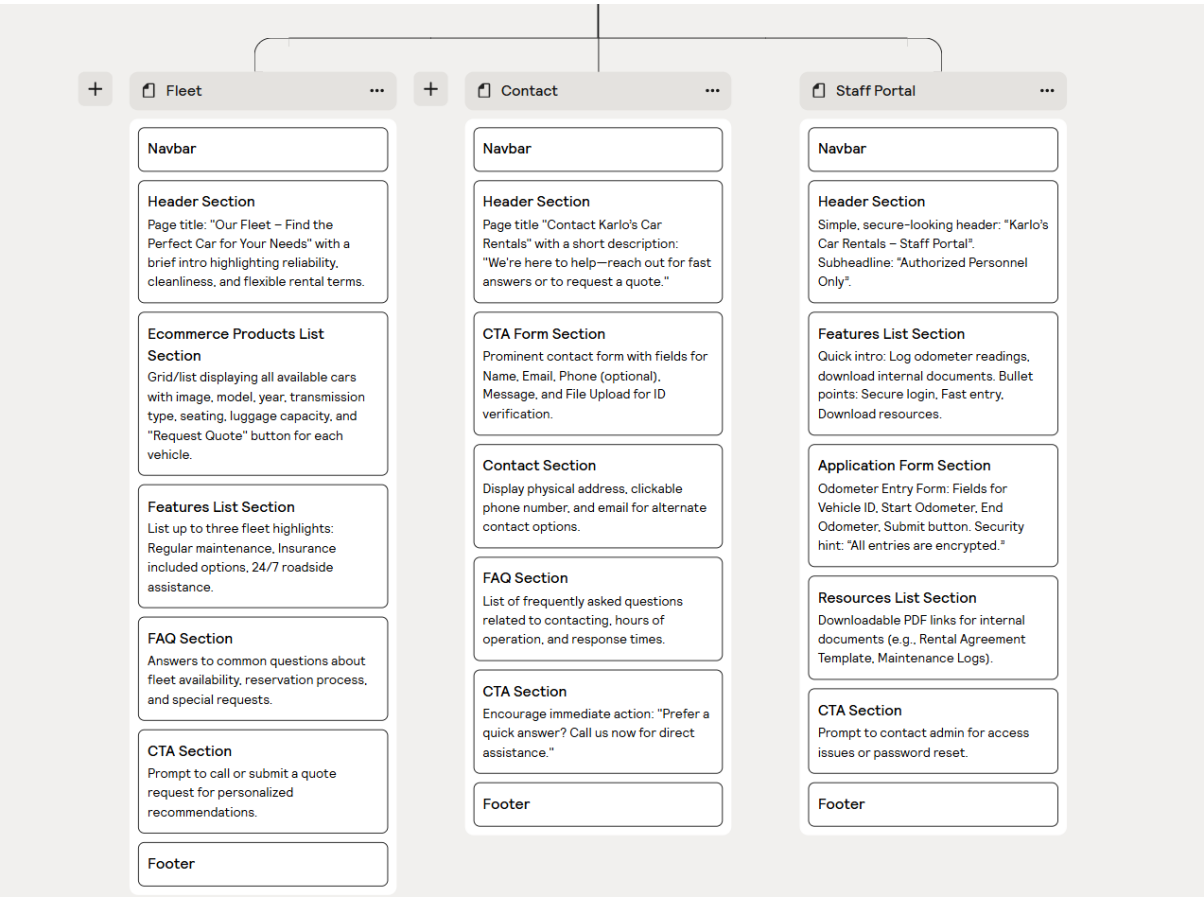
FAQ Section

Frequently asked questions about rental process, insurance, and fleet.

CTA Section

Encourage visitors to call or fill out the form for fast service.

Footer



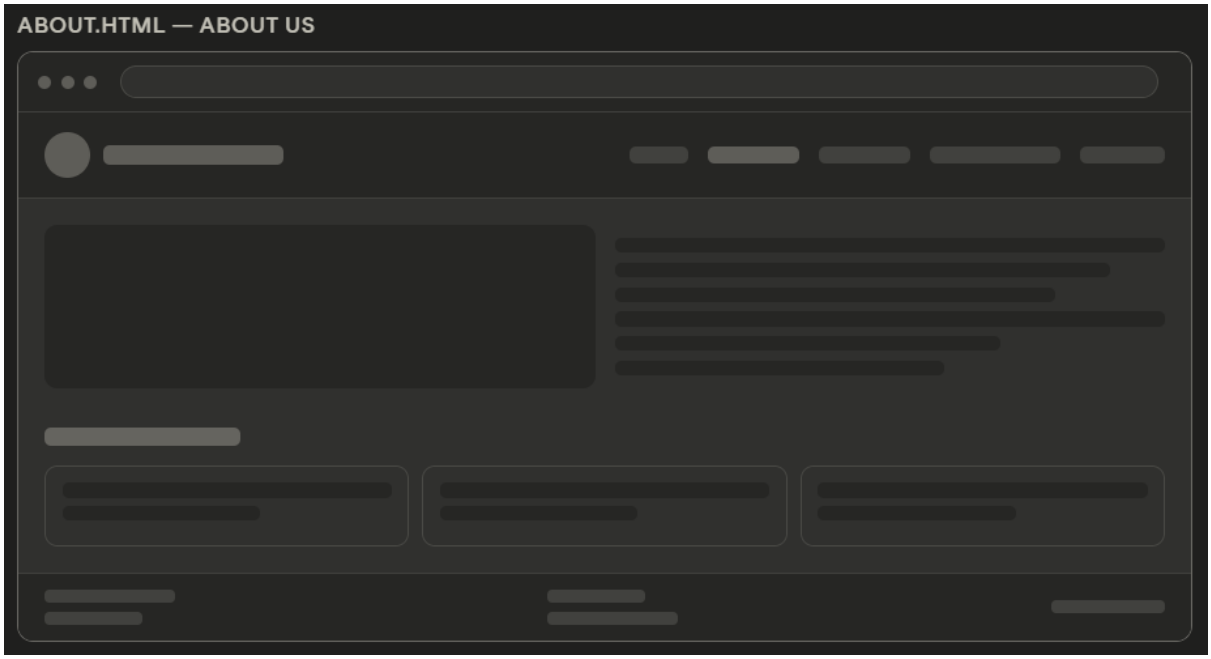
Technical briefs

- JavaScript for dynamic behaviour and interaction;
- CSS3 for presentation and styling; and
- HTML5 for the website's structural layer
  For responsive frameworks, use BootStrap5.

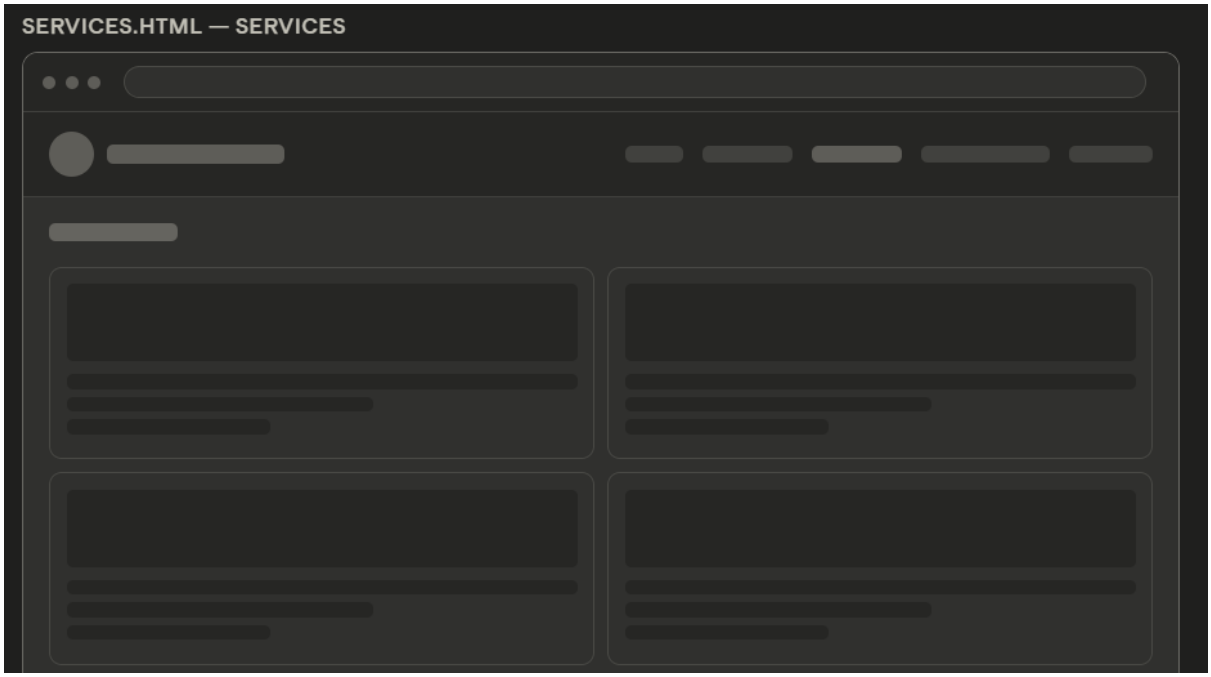
Low fedility Wireframe

Index.html — This is the landing page. It leads with a hero banner (headline, tagline, and a CTA button like "Book Now"), followed by a featured car grid showcasing available vehicles, then a footer with contact info.

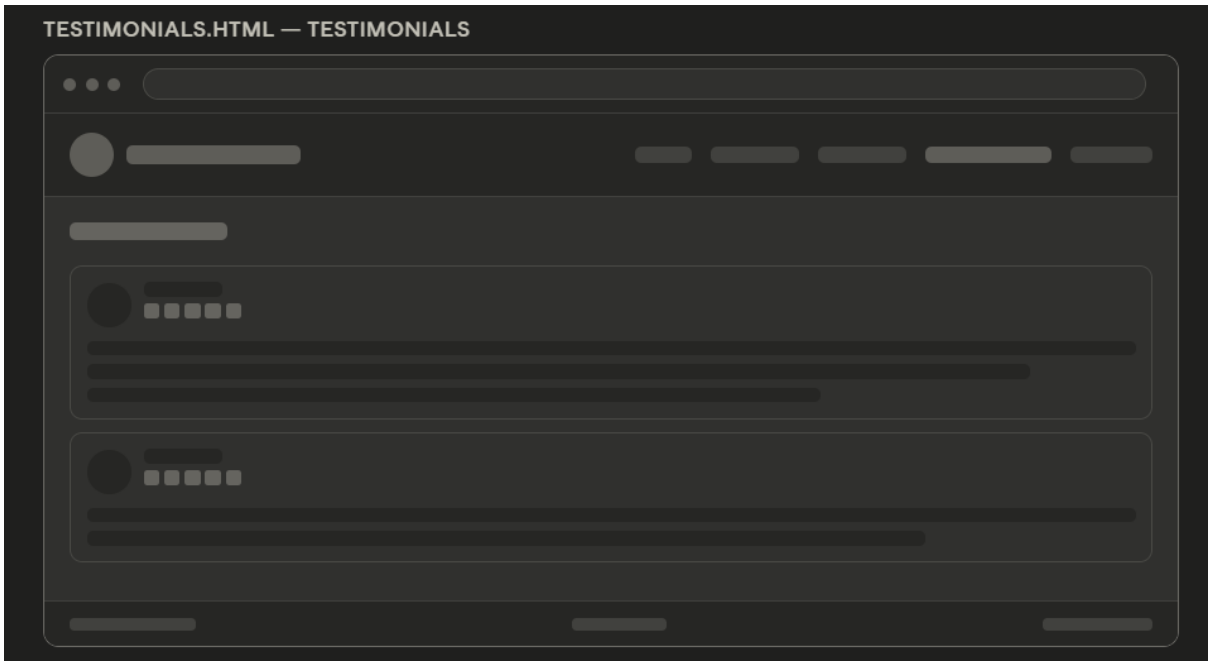
About.html — About Us introduces the company. It uses a two-column layout which includes a photo or image on the left, with a text block on the right describing the business story or mission. Below that, a row of stats/value cards (e.g. years in business, fleet size, customer count)



Services.html — Services details what the company offers. A 2×2 card grid presents individual service types , each with an icon or image, a title, and a short description



Testimonials.html — Testimonials is a social proof page. It displays stacked customer review cards, each with an avatar, name, star rating, and a short quote — building trust with prospective customers.



Contact.html — Contact combines a map placeholder at the top with a contact form (name, email, message, submit button) , and address/phone information. The active nav item shifts to highlight the current page across all five pages.
